- APRIL - 1976 -

APRIL PROGRAM: Stars would soon burn themselves out from radiation loss were it not for re-absorption of its internal energy by the star itself. Nevertheless, a tiny part does escape, resulting in a mass loss.

Dr. Joseph Cassinelli, Asst. Professor of Astronomy at the UW-Madison and an authority on stellar evolution, will explain mass loss of hot stars in his talk. "CORONAE OF HOT STARS". This is a comparatively new field, puzzling, and filled with much speculation, so you will find Prof. Cassinelli's talk very informative.

Attend! Bring a friend!

WHEN AND WHERE - Friday, 16 April, 8 p.m., Room 133  
Physics Bldg., Corner of Kenwood and Cramer.

IN MEMORIUM: Mr. Walter Zinn, a long time member of the Milwaukee Astronomical Society, passed away while vacationing in New Zealand.

Mr. Zinn, a Founder Member, joined in 1960. He served as a board member and his enthusiasm for the purpose and goals of the society made him a generous patron.
